

I was an employee of New Park Mining Company from 1940 to 1960 as engineer and geologist, mine superintendent, and vice president. My wife and I lived at the Park Galena Mine and had many good friends in Heber City and Park City. This picture is of our employee mine rescue trained by the U.S. Bureau of Mines at Salt Lake City. The bureau man is on the right side, Ace Olsen was a shift boss (rear right). I am on the right. The other individuals I remember as excellent mines but the names now escape me. Perhaps someone out there knows who they are. 5-23-80 —Submitted by Clark L. Wilson
